Portfolio - https://jjashwinkumar.vercel.app/

Summary

Senior Frontend Engineer with 7 years of experience designing, building, and scaling high-performance web applications across fintech, payments, e-commerce, and enterprise domains. Strong expertise in frontend engineering with React, Next.js, TypeScript, and modern JavaScript ecosystems, complemented by hands-on experience in backend development, APIs, cloud services, and full-stack system design.

Proven track record of leading architecture decisions, developing scalable micro-frontend and distributed systems, optimizing Core Web Vitals and application performance, and delivering mission-critical products end-to-end.Passionate about leveraging AI-assisted development workflows and intelligent product capabilities to accelerate delivery, improve developer productivity, and enhance user experiences.

Core Compentencies

Frontend Architecture & Engineering

React, Next.js, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS, Material UI, Micro-Frontend, Design Systems, Component Libraries, SSR/ISR, State Management

Performance Engineering

Core Web Vitals, Lighthouse, Bundle Optimization, Code Splitting, Lazy Loading

Backend & APIs

Node.js, Java (Spring Boot), .NET (C#), RESTful APIs, Microservices Architecture.

Cloud & DevOps

AWS, CI/CD (Jenkins, GitHub Actions, Harness), GitLab, Release Management, Production Deployment Strategy.

Testing

Jest, React Testing Library, Unit Testing, Integration Testing.

AI Engineering

Prompt Engineering, LLM Workflows, AI-assisted Development, Automated Test Generation, GEN AI

Leadership & Engineering Excellence

Technical Leadership, Architecture Decision Making, Team Mentoring & Coaching, Code Reviews, Technical Design Reviews

Professional Experience

Moniepoint Group **July 2025 – Current**

Senior frontend Engineer *Bengaluru, India*

- Led frontend architecture and development for **MonieDesk**, a large-scale enterprise operations platform serving **8,000+ users** across support and business teams. Led the complete frontend rebuild of MonieDesk from the ground up, driving the migration to a modern, scalable architecture using AI-assisted development workflows to accelerate delivery while maintaining code quality and consistency.
- Designed and developed scalable, reusable frontend applications using **React, TypeScript, Tailwind CSS**, and modern frontend engineering practices. Architected and implemented micro-frontend integrations to enable independent development, deployment, and scaling across multiple product teams while maintaining consistent UX and shared frontend standards.
- Improved operational efficiency by **30%** through workflow redesign, UI optimization, reusable component architecture, and frontend performance improvements. Reduced page load times by **35%** and increased **Lighthouse scores from 68 to 90+** through code splitting, lazy loading, caching, rendering optimizations, and

bundle-size reduction.
- Enhanced CI/CD and frontend release processes, reducing production deployment failures by **25%** and improving deployment reliability. Led technical design reviews, established frontend engineering standards, and mentored junior engineers. Introduced AI-assisted development practices across the team, improving development productivity by **20%** and enabling the team to accelerate the complete MonieDesk rebuild from scratch.

Visa Inc **June 2023 – July 2025**

Senior Software Engineer *Bengaluru, India*

- Owned and led development for **three mission-critical micro-frontend applications** within the Authorize.Net payment ecosystem which is used by thousands of merchants.
- Managed frontend systems supporting high-volume transaction environments with strict security and compliance standards.
- Migrated legacy UI modules to ***React + TypeScript architecture***, reducing regression defects by **22%**.
- Spearheaded frontend modernization initiative improving maintainability and reducing technical debt.
- Reduced post-release production issues by **20%** through structured testing strategies and improved code review processes.
- Optimized CI/CD pipelines using GitHub and Jenkins, improving deployment stability and reducing rollback incidents by **30%**.
- Mentored newly onboarded Frontend Engineers, guiding them on code standards, architectural principles, and secure frontend development practices.Leveraged AI-assisted development tools to accelerate refactoring, documentation generation, and unit test creation.

TEK Systems **Dec 2021 – June 2023**

Senior Software Engineer *Bengaluru, India*

Schneider Electric – EcoStruxure Power Commission Software

- Owned frontend system for enterprise energy management platform.
- Led React UI performance improvements and architectural refactoring initiatives.
- Resolved complex UI performance bottlenecks impacting enterprise customers.
- Collaborated across global teams to enhance stability and scalability.

Tata Cliq – E-commerce Platform

- Developed critical user flows including PDP, Profile, and PLP system flows.
- Built REST APIs and fullstack integrations to support seamless UI experiences.
- Contributed to frontend performance optimization and improved scalability.
- Advocated Agile best practices to accelerate feature delivery.

Codebrahma **Aug 2019 – Nov 2021**

Software Developer & Intern *Bengaluru, India*

- Contributed to enterprise cloud and web applications for multiple clients.
- Developed scalable UI components and reusable frontend libraries.
- Contributed to open-source React-based website builder (Composer).
- Worked on cloud-native security platform (AccuKnox), focusing on scalability and reliability.
- Gained strong exposure to AWS-based deployments and microservices architecture.

Awards & Achievements

- **Runner-Up – Visa Engineering Hackathon**: Built an AI-powered Image-to-Code generation solution leveraging LLM-based models to convert UI mockups into structured frontend components, demonstrating innovation in AI-assisted development workflows.
- Contributed to open-source React libraries adopted by the developer community, enhancing reusable component patterns.

Education

Kongu Engineering College **May 2016 – Mar 2020**

BE Computer Science- Grade: 7.99 *Erode, India*
